

Huddle Helper HEPA Filters

11/19/2020

New Patient Set Up

- If Covid + patient is assigned to a non-negative pressure room, Bed Management will call Maintenance to request a HEPA filter
- Maintenance will deliver the filter to the requesting room
- Nursing should move the filter into the room, face it towards the patient bed, and plug into the outlet.

A

HEPA Filter
exchange is required
with new admission
room assignment

Patient Discharged

EVS will terminally clean the room

- Wipe down the exterior casing of the filter
- Bag the unit
- Place outside the room

RN or UA will call Maintenance to pick up the unit for a filter change
