Thermometer Screening

St. Joseph's has two different types of thermometers for screening core temperatures:

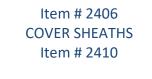

Exergen Temporal

Fisher Infrared Non-Contact

FISHER
Infrared Non-Contact
Item # 60297

STEP 1

Press Button on thermometer (keep button depressed for all three steps) and place at the center of the forehead.

STEP 2

Glide thermometer across the forehead toward the temporal, just to the hairline (remember to keep holding the button down on the thermometer).

STEP 3

Lift the thermometer from the temporal and place on the neck, just behind the earlobe. Release the button and read the temperature.

STEP 1

Aim non-contact thermometer at the center of the forehead. DO NOT TOUCH FOREHEAD (3 to 6 inches away)

STEP 2

Hold steady and gently squeeze the button on the thermometer handle and read the temperature.
